

"LIVE" WEIGHT ESTIMATES OF DEER CHART

<u>Heart girth inches</u>	<u>Adult pounds</u>
30	90
31	98
32	106
33	113
34	121
35	128
36	136
37	144
38	151
39	159
40	166
41	174
42	182
43	190
44	197
45	205
46	213
47	220

To calculate "live" weight, first measure heart girth-the circumference of body just behind the front legs. Then consult this chart to convert girth into a close estimate of weight.
